# MISSIONS

## **International cooperation**

DCI (Défense Conseil International) is a key operator in the transfer of know-how from the french Armed Forces to all over the world, thereby strengthening military cooperation and the interoperability of armed forces. As a company with a mission and a major operator for international organizations, DCI is committed to promoting the objectives of the European Union and NATO. DCI is an implementing partner of the European Union and an executive partner of NATO.

## **Capability building**

For over 50 years, we have been helping our customers to develop their military and governmental capabilities to meet regional and international security challenges. We work with them to ensure that their organizations and training are of the highest standard, and offer them high value-added operational and support services.

## **Defense Innovation**

DCI (Défense Conseil International) is a key player in the innovation and implementation of defense and security systems. Whether by assisting with the development, qualification or entry into operation of systems, or by advising on and setting up organizations and ecosystems that foster innovation, DCI provides governments and industries with the capacity to bring to fruition the innovations they develop or need.

## **INTERNATIONAL PARTNER OF THE INDUSTRY**

**DCI supports the French defence industry**, as well as their European partners, throughout the entire process of selling their systems and equipment abroad. DCI group operates either within the framework of government to government agreements at the initiative of France and its foreign institutional partners, or at the contractors' request. Our aim is also to promote long-term partnerships with industrial prime contractors and small and medium-sized companies in order to develop truly comprehensive offers.

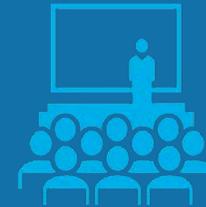

We support international industrial cooperation by transferring doctrines, concepts of operations and training syllabus similar to those of France. DCI group also assists you in the marketing, demonstration and evaluation phases by providing the operational experts necessary for the operation and support of your equipment. In addition, DCI group provides the full spectrum of operational training, technical assistance and in-service support to ensure that end users enjoy full control and a high degree of satisfaction.

# ORGANISATION & GOVERNANCE

**DCI (Défense Conseil International)** is organised into four operational branches corresponding to each of the French armed forces and the DGA, along with several departments including Aircraft Operations (Pilot Training, Maintenance Training and end to end Helicopters Maintenance).

DCI is fully compliant with the rules prohibiting corruption or influence peddling, while placing the quality of the services it performs and the integrity of its employees at the heart of its daily activity and corporate governance. DCI obtained ISO-37001 certification in 2019.

# SOLUTIONS

## **Defense & Security expertise**

DCI (Défense Conseil International) leverages its extensive expertise in Defence & Security to define, audit and/or optimise your strategies, doctrines, concepts of operations (CONOPS), capabilities, etc. We provide a personalised response to all your needs for advice and assistance in our sectors of activity. We can also build, equip and/or operate “turnkey” training or capability support centres. We also offer armament project management assistance services. We provide assistance during the following phases: preparation (technical and operational requirements, acquisition process), programme implementation (project management and contract monitoring) and in-service support (advice and optimisation).

## **Academic Training**

We train your cadets, officers and military engineers to the highest French standards (Saint-Cyr Coëtquidan, École Navale, École de l’Air, ENSTA Bretagne, ISAE...) so that they are fully operational in your forces and become your future military leaders. And we provide personalised support throughout their career (e.g. École de guerre).

## **Operational Training & Simulation**

We train your soldiers, engineers, pilots, operators, mechanics, special forces and homeland security forces across the entire operational spectrum of the French armed forces and Gendarmerie. We carry out these training sessions in France in our centres equipped with the latest technologies or directly in your facilities. Finally, we are innovating with new training services such as “adversary forces” on land (FORAD) or in the air (LVC, Red Air...).

## **Providing & Supporting Military Capabilities**

To optimise your material, human and financial resources, we offer “off-the-shelf capabilities” through innovative solutions for the provision of operational equipment (e.g. aircraft, helicopters, UAVs, etc.) and fleet operations. These solutions can be provided through outsourcing contracts or Public-Private Partnerships (PPP) in France and abroad. DCI group is also the preferred partner for In-Service Support (ISS) and base maintenance of your equipment to ensure optimum availability.
